

## Argument for Measure “O”

### Security, Health and Safety Bond Measure of the Chualar Union School District.

Chualar believes our children deserve a quality education. This includes healthy and safe environments to learn and play.

Vote YES on the Measure “O”, to improve the security, health, safety and modernize Chualar school!

Our original school was built in 1908 and our newest permanent classrooms are nearly 45 years old. It has been nearly two decades since our community approved a school improvement measure. Our school facilities needs have significantly increased since then. Some big challenges include leaky roofs, flooding, deteriorated restrooms, outdated technology, alarms and fencing to name a few.

The District has done its part to evaluate its facility needs and funding options. Current resources are limited and are dedicated to supporting student instruction, teachers, and day-to-day operations. Today, the District needs your help to tackle the most pressing facility concerns.

With your approval, Measure “O” will:

- Improve health and safety, including security systems, fire alarms, fencing, and lighting
- Repair aging infrastructure, including replacing leaky roofs, upgrading restrooms, HVAC, dry rot, windows, electricity and plumbing
- Modernize and rehabilitate outdated classrooms and technology, including building a new science lab

The District is committed to transparency and taxpayer safeguards. Measure “O” will install a community oversight group to ensure every dollar goes to making the improvements as promised. Additionally, Measure “O” is estimated to make the District eligible for \$1.8 million in state matching funds.

Chualar school serves as the center of the community. Let’s renew our support so that our children have a safe and healthy place to learn and play. Our investment will have an impact on the lives of our children and greater community for many generations.

Vote YES on Measure “O”!
